9. Sports Day Events

The Campcraft Section

Each patrol site will have the following Gadgets to put up

- Table & seating
- Boundaries to site (x4)
- Dresser
- Clothes Line
- Bin System
- Gateway

Table and Seating

This should be simple in design and have one set of seats (See Drawing)

Dresser

Should hold all your plates, bowls, Cups and cutlery. Design should be simple but it must work. Plates cannot fall off the gadget. Bamboo can be used.

Clothes Line

This must work and should be safe. If guys are being used this must be done safely.

Don't build anything that does not work. You will lose the campcraft trophy

Bin System

There will be a lot of points going for this.

Because of the recycling system Petersburg has in place the marking sheet will be very strict on this gadget. It will be marked daily.

Keep it simple and only make something that works.

A detailed drawing will be given to you closer to the time.

Each patrol will have to use there own bin after meal times. This will then need to be emptied.

Campcraft will begin on the First Sunday.

The main aim of the Camp craft this year will be based on maintaining the patrol site. This inspection will be looking for the hygiene of inside the tent and within the site boundaries.

Progress

- There will be only one Progress inspection.

Site maintenance & Hygiene (this inspection will take place most days)

- Personal Gear / bags will also be looked at. A black bag of dirty clothes should be in every Rucksack on site.
- A line will be needed
- Storage of Uniforms will be looked at every day.
- Basic Tent pitching will take place in this inspection
- Hygiene of Patrols eating Equipment will be looked for.
